

Installing the Module

The SiPRO logo is a purple rounded square with the word "SiPRO" in white, bold, sans-serif font. It is positioned in the top right corner of the page, overlapping a decorative background of purple and white halftone dots.

Installing the SiPRO module is simple and follows the standard Odoo app installation process.

Before You Begin

Please ensure

- ☐ your Odoo database is running on a supported version - we have tested on Odoo versions 18 and 19
- ☐ the required dependent apps are installed - base, product, stock, sale, hr, contacts and purchase
- ☐ you have administrator access to Apps and Settings
- ☐ the module has been added to your Odoo instance by your hosting provider, technical team, or deployment partner

Install the Module

1. Log in to your Odoo database as an administrator.
2. Open the Apps menu.
3. Search for SiPRO.
4. Click Install.

The SiPRO logo is a purple rounded square with the word "SiPRO" in white, bold, sans-serif font. It is positioned on the left side of the module card.

SiPRO

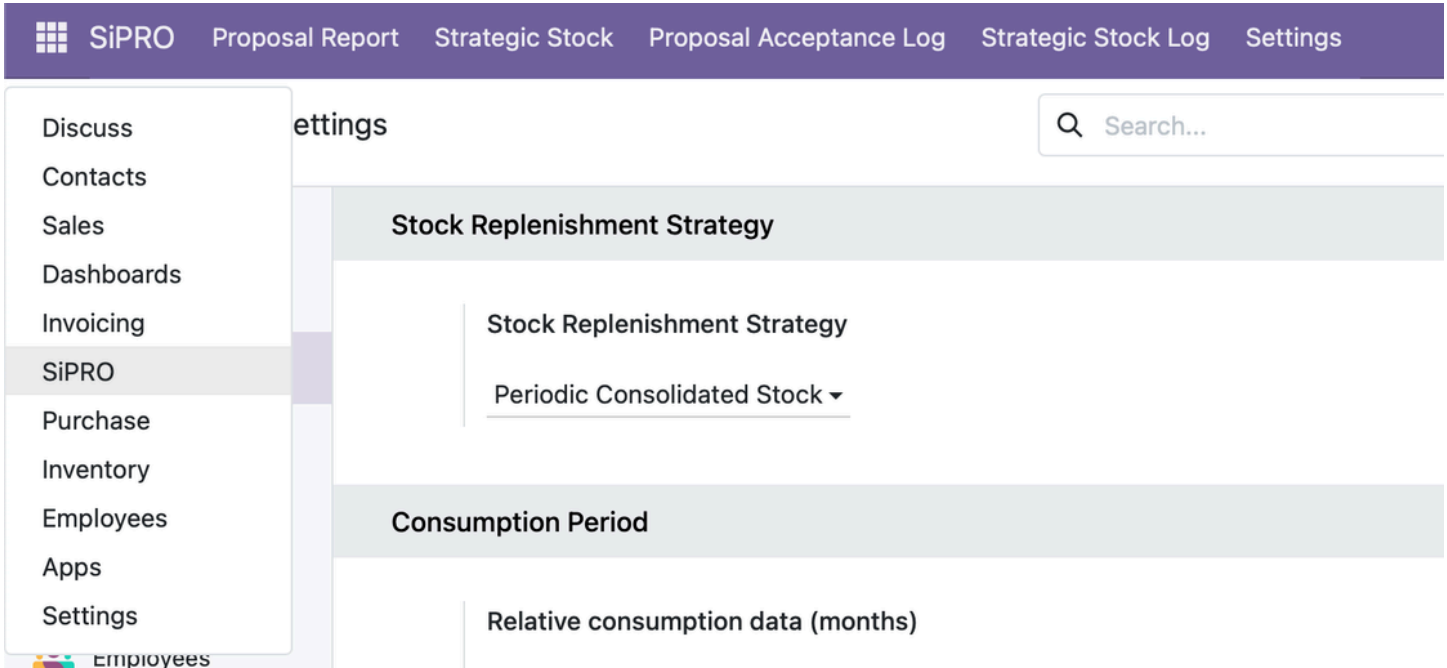

Automated Strategic Inventory Planning
& Risk Optimisation for Odoo

[Learn More](#)

Once installation is complete, the module is activated automatically.

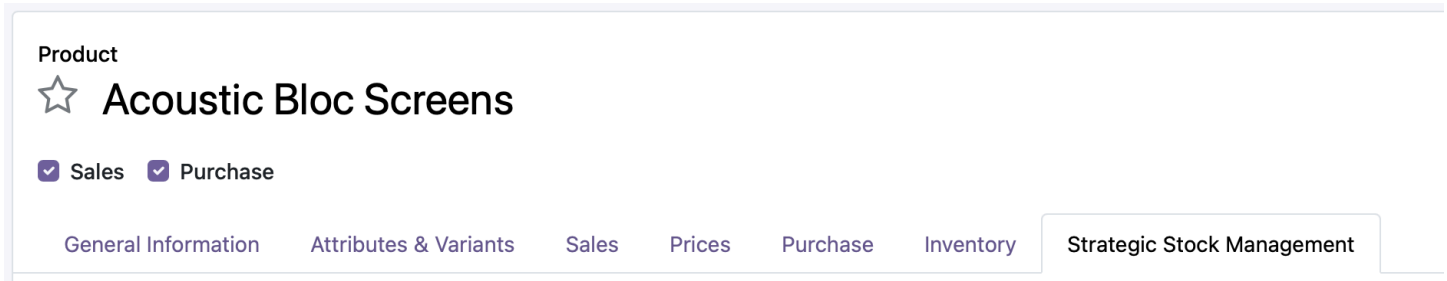

After Installation

After the module is installed, you will see a new main menu called SiPRO.

The module also adds:

1. the Proposal Report
2. the Strategic Stock workspace
3. the Proposal Acceptance Log
4. the Strategic Stock Log
5. the module Settings page
6. the Strategic Stock Management tab on the product form

In addition, the module automatically creates a scheduled action that checks daily for expired strategic stock records and reverts them when required.

Troubleshooting

If the module does not appear in your Apps menu, this usually means:

- the app has not yet been uploaded to your Odoo server
 - server restart may be needed
- the Apps list has not been refreshed
 - from developer mode, try updating apps list
- your user account does not have sufficient access rights
 - ensure you have admin previleges

It will be best to have your Odoo administrator or implementation partner activate the module.
